\*Note: Hispanic race is calculated separately from ethnicity.

\*\*Note: Where mean/median are presented, an index has been calculated instead of a percent. Indices provide a comparison of a group value to the overall value and are calculated using the formula: (group #/overall #)\*100.

The closer an index is to 100, the closer the group's result is to the overall. A score of 100 indicates the group had the same value as the overall.

A score above or below 100 indicates the group value is greater than or less than (respectively) the overall value.

\*\*\*Note: Social issue rank orders are from a study conducted by MHCC in 2007. The complete report for this study is available by contacting the office of Analytics and Institutional Research at 503-491-7112.
