Computer Information Systems: Question 1

Was there a specific course (or courses) you considered more valuable than others?

- * Programming, All 3D modeling classes, and Game Theory
- * Anything related to coding helped a great deal.
- * No specific course was better than the others. The program (When I took it) was very good at spreading out the necessary information needed within 2 years to not make you feel overwhelmed or bored.
- * All the C++ courses
- * I found the Ethical Hacking course quite insightful, it opened my eyes to a lot of threats that exist out there, some of which I hadn't heard of before. Very relevant to Cybersecurity, and best practices with regards on how to defend ourselves and how to
- * The networking course CIS151N (I think) @ MHCC does an EXCELLENT job of prepping you for both starting off in networking, as well as for preparing you to take the CompTIA Network + exam.
- * Computer Concepts III was the only class that really taught anything valuable that carried over into my IT work. The CIS program should push for more required Network classes.
- * The intro to forensics course introduced me to new tools that I could use to troubleshoot a computer system with or to recover deleted data. My writing courses helped greatly with sentence structure and writing cohesive sentences.
- * No
- * Math, Yoga, Art
- * Ethical HackingIntroduction to Computer Security (Security+ Prep class)
- * I enjoyed the ethical hacking course and the linux course
- * Cyber competition
- * There were a couple courses that have helped me after graduating. CIS195, CIS 197HTM, CIS 197 WAG, & CIS 125 SS.
- * I found my programming classes very important, and I have learned alot from them. This was CS160, 161, 162 and 260.
- * A+ class should have been required the first year in the CIS:IT program.
- * CIS197HTML, CIS197CSP, CIS197WAA, CIS197WAG, and CIS295CMS
- * CIS122 - learning how to Google hack. Google hacking taught me how to look up information I needed in the field.
- * The cisco classed and labs were very valuable. Having hands on in the Cisco lab at MHCC was very valuable.
- * Html and CSS classes were super helpful.

Are there any new tools, applications or standards the program should address?

- * see above.
- * VMware, virtual pc, and more server application related courses; such as learning how to deploy updates, etc.
- * Wordpress, SASS, meteor.js, and bootstrap to name a few off the top of my head
- * It would be really cool if we learned what a VDI environment is like.
- * I wanted to see more from the Ethical Hacking class (it was a great class by all means), but I think it could have been even better if there were more courses in a set of series such as Level I, II, and III.
- * SIEM's. Not a single tools class was taught. The theory is awesome, but there should be at least an intro to SIEM's class for anyone interested in working as a SOC analyst or any type of analyst for that matter. (contact me, I would be happy to teach the
- * I thought the program was well rounded.
- * Follow PSUs curriculum more closely
- * much stronger coding requirements, Stronger math requirements, stronger art requirements, music appreciation(in the least)
- * Need more up to date technology and practices that are found in the general IT world. Increase the number of Networking and Window Server classes.
- * Integrating classes in cloud security Basic malware analysis class
- * Mobile development was barely talked about in game design
- * Virtual Machine/environment, complete course on implementing windows/365 in server environment
- * Although I don't care for it, there are a ton of platforms that customers tend to want to use such as GoDaddy Website Builder, Wix, Squarespace. Although we touched on them with Dreamweaver, WYSIWYG platforms seem to be the way that most sites are headed.
